

Your MRI Exam

Your MRI Exam will last approximately 45 to 60 minutes. Please dress comfortably, in clothing that does not contain metal. Keep in mind that you will be asked to remove hearing aids, jewelry, watches, wallets, money clips, keys, credit cards and all other metallic items. For upper extremity exams, you will not be able to wear glasses or bras with hooks or underwires. For knee exams, wear shorts or baggy pants that will pull up above the knee. Please arrive a few minutes before your scheduled appointment as you will be asked to fill out a very important screening questionnaire.

Your Bone Density Exam

Your bone density exam is a very simple process that will take approximately 15 to 20 minutes. Please dress comfortably, in clothing that contains no metal in the area hips, low back or navel. This includes fly front zippers. (Sweat pants or other elastic waist pants are best.) Also, your right wrist may be scanned, so please refrain from wearing jewelry in that area.
